# INSTALLATION SHEET

Step 1:
Properly terminate a screened keystone jack with screened cable for DIN RAIL grounding connection.
Step 2:
Insert the keystone jack into DIN RAIL module, make sure the jack latch faceing up.

Step 3:
Lock the module and make sure the grounding spring contacts the jack to ensure grounding connection.
Step 4:
Insert the DIN RAIL module at the top and rotate to click.

Step 5:
The module is slidable on the DIN RAIL. With rows of modules, covers are only needed for the right and left ends of the row.

Remove:

Screwdriver

Insert a screwdriver into the opening at the bottom of the module and use it as a lever to pull out the module.

Open:

Use screwdrivers or fingers to open the poles at the top of the module.
